BIOMIMICRY 3.8

WE ARE A YOUNG SPECIES 2018 CALENDAR

Life has an incredible amount to teach us about living well on planet Earth, in no small part due to the fact that it's been thriving here for 3.85 billion years. But, how long is that really? This calendar showcases what it looks like if we take the age of Earth (4.5 billion years) and compress it into one 12-month year, outlining the major milestones for Life each month.

Print this calendar so you can celebrate Life and all the milestones throughout 2018.
